Background

The Federated City Employees' Retirement System ("System") Board's Investment Policy Statement ("IPS") outlines the delegation of authority by the Board to the CIO to select and terminate investment managers. This document contains the specific implementation procedures ("Procedures") for the CIO's exercise of that delegated authority over manager selection, retention, evaluation, termination, and fees. Sample process documents are included in the appendix.

Minimum Qualifications (also noted in IPS)

General Constraints and Parameters

- A. The CIO's authority to select and terminate investment managers shall be subject to the following general constraints and parameters in addition to the Procedures:
1. Investment managers shall meet the following **minimum qualifications** to be selected to manage any assets of the fund:
 - a. Be **registered as an investment advisor** under the Investment Advisor's Act of 1940 or comparable legislation, unless the manager represents and warrants that it is exempt from such registration under applicable law and provides the basis for the exemption.
 - b. Agree to serve as fiduciaries to the System and to enter into a contract with the System requiring them to perform their services consistent with the fiduciary services established under (a) the Investment Advisor's Act of 1940; (b) California law applicable to fiduciaries of public employee retirement systems, which includes the California State Constitution, Art. XVI sec. 17 and the San Jose Municipal Code and/or (c) terms and conditions substantially comparable to the foregoing that are satisfactory to the System.
 2. The nature and size of the manager's mandate shall be consistent with:
 - a. The asset allocation policy of the System;
 - b. Applicable constraints contained in these Procedures and the System's Investment Policy Statement, including the total System **active risk limit(s)¹ contained in the risk section of the System's IPS.**
- B. The Procedures shall include examples of **checklists and templates** used in the due diligence process. Staff will present a sample due diligence presentation to the Investment Committee annually.
- C. The selection of an investment manager that would contravene a provision of the IPS or the Procedures shall require approval by the Investment Committee.

¹ Active risk or tracking error limits may apply at the total fund level, or another aggregation (e.g. public markets assets only, excluding private markets). Risk limits may also be based on concentration, expressed for example, as a percentage (%) of some total amount of risk.

Manager Selection Process

- A. The process used to select an investment manager shall, at a minimum, include the following elements:
1. Imposition of a Quiet Period/No Contact policy. Board members and non-investment staff shall not have contact with parties who are under consideration for engagement by the System in response to an RFP, RFI, purchase order, other solicitation or other contracting process that has reached the point of specific focus on such parties, except in accordance with the published terms of the contracting process or except for, and limited to, contact necessary in connection with ongoing System business with a party. The System's communications with such parties shall include notice that a no-contact "quiet period" will be in place from a specific date until the contracting decision is finalized with respect to such parties, such that these communications shall not occur, except as provided above. As part of the contracting process, potential contracting parties (a) shall be informed by investment staff of the quiet period requirements and that violations of the quiet period requirements will cause immediate disqualification from their being engaged by the System; (b) shall be required to disclose potential conflicts of interest; and (c) shall make the placement agent disclosures required by law and System policies. Board members and non-investment staff shall not influence or attempt to influence, the System's decision-making process, outside of the authorized actions on behalf of the System.
 2. Identification of a mandate to implement the Board's SAA Policy Portfolio.
 3. **Operational due diligence** performed by the investment staff, qualified investment consultant, or qualified quasi-discretionary investment manager;
 4. **Legal review** by qualified investment counsel of the manager agreement and related documentation;
 5. **An internal meeting of investment officers, including the CIO** and the officer responsible for the asset class in question, during which staff's due diligence analysis is reviewed and debated and a staff recommendation is made;
 6. **Approval by the CIO;**
 7. **Concurrence by a qualified investment consultant** or quasi-discretionary investment manager as to the reasonableness of the selection decision; and
 8. The CIO shall provide the Investment Committee with a summary of all active manager level transactions semi-annually.

- B. Should any Investment Officer responsible for performing manager due diligence and preparing manager selection and termination recommendations to the CIO cease to be employed by the City for any reason, the CIO shall inform the Investment Committee immediately.
- C. The selection of an investment manager that would contravene a provision of the System's Investment Policy Statement or the Procedures shall require Investment Committee approval prior to investing.
- D. A file or files shall be established to serve as a permanent record of the due diligence process for each investment manager hired and shall contain a summary of the due diligence information and analysis generated during the search process, as well as the legal documentation. This will be made available to the internal auditor upon request.
- E. A **"Watch List"** will be established for underperforming managers and managers under extraordinary review for qualitative reasons and will be maintained by the General Consultant and provided to the Board on a quarterly basis.
 - 1. Quantitative criteria for underperformance which would trigger placement on the Watch List includes manager underperformance versus the appropriate benchmark over a three and/or five-year period.
 - 2. Potential actions resulting from placement on the Watch List include finding appropriate resolution of outstanding issues, renewed confidence in the manager or strategy, or determination that the termination of the manager or strategy is appropriate.
 - 3. Investment staff will identify underperforming managers in conjunction with consultants.
 - 4. As necessary, nuanced investment strategies or fund types may require customized review.

Investment Limits

- No more than 15% of total System assets in an active investment strategy
- No more than 25% of total System assets in active and private investment strategies managed by a single asset management firm at time of investment²
- No direct investments or co-investments (except where an external manager has discretion)
- Up to 1% of total System assets per private markets investment at time of investment ^{3,4}
- Total \$ commitment to a private markets asset class (e.g. Private Debt) in a fiscal year of 150% of Board-approved pacing plan (cumulative)⁵

² Passive investments are not subject to any limits.

³ The limit for acquisition of secondary interests is calculated as purchase price at time of investment plus any remaining unfunded commitment.

⁴ For fund-of-one's, the limit applies to underlying investments, not a commitment to the fund-of-one.

⁵ The "cumulative" provision allows for a "catch-up" for slower than planned investments in prior years to the extent that the previous fiscal year asset class deployment was below the Board-approved pacing plan for that asset class.

Private Markets Pacing Plan

On an annual basis, a pacing plan will be approved by the Board which models estimated commitment amounts for the pension plan to reach and maintain target allocation to private markets asset classes.

Many assumptions are incorporated into the pacing plan models. Because of the assumptions' high variance (actual vs. forecast), the pacing plan is revisited annually. Staff produces plan-level NAV targets for each private markets asset class, which are then provided to consultants for detailed modeling on Buyout, Venture Capital, Private Debt, Growth Real Estate, and Private Real Assets. Staff aggregates the output into a single pacing plan document to allow stakeholders to view the private markets program holistically.

When actual private markets exposure is below the target allocation, a passive public markets proxy is used to rebalance to target.

Reporting

Reporting processes are designed to provide the Board and Investment Committee ("IC") with the information needed to execute its oversight function and to meet its duty to monitor its delegation of authority to the CIO so that it can discharge its fiduciary duty under the law. Accordingly, the CIO along with the general investment consultant shall prepare the following to the IC and Board.

1. Investment performance reports will be presented to the Board on a quarterly basis.
2. Asset class overviews which will be presented to the IC on an annual basis.
3. A sample investment due diligence presentation which will be presented to the IC on an annual basis.

Manager Retention, Evaluation, and Termination Procedures

- A. The Office of Retirement Services investment staff is aware that the ongoing review and analysis of investment managers is just as important as the due diligence implemented during the investment manager selection process. The performance of the investment managers will be monitored on an ongoing basis and it is at the CIO's discretion to take corrective action by terminating and/or replacing an investment manager if it is deemed appropriate at any time for any reason.

The CIO may terminate an investment manager or product due to a variety of reasons. These reasons can include but are not limited to the following:

1. System asset allocation change
2. limited market opportunity
3. style drift
4. violation of policies or guidelines
5. key personnel turnover
6. failure to achieve performance or risk objectives
7. legal or regulatory action
8. any change deemed likely to impact or impair investment performance
9. any other material adverse events, whether reputational or financial, that could be expected to cause significant headline risk

Termination of private funds is typically not possible. If the CIO wishes to exit a private fund, they may evaluate opportunities for secondary market sales of fund interests.

The CIO will report any termination actions at the next IC meeting and Board quarterly performance report.

Investment Monitoring

In collaboration with consultants, investment staff will monitor the organization, team, and investments through reporting packages, annual meetings, and update meetings as necessary. Any material changes will be investigated and reported to the Board in quarterly performance reports.

Diversification

Each asset class will be appropriately diversified. This may include diversification by strategy type, vintage year, investment manager, number of underlying investments, risk exposure, and geography. For private markets, unfunded commitment amounts will be considered when evaluating diversification. Portfolio construction frameworks will evolve over time as the market opportunity set changes.

Investments will be made based on the merits of the underlying investment and not simply for diversification purposes.

Fees/Expenses

1. The System will seek alignment of interests when negotiating fees while pursuing the best net of fees performance results. Investment costs shall be monitored, controlled, and whenever possible negotiated to ensure cost effectiveness. The Board shall give consideration to the impact of administrative expenses, external management fees and performance fees when establishing the asset mix policy of the System. The Board will be provided reports on investment costs of the System at least annually.
2. The System's staff, in coordination with its investment consultants and legal counsel, will negotiate, monitor, and report on fees with investment managers regularly to ensure market competitiveness and appropriateness.
3. The System will seek to ensure that excessive fees are not being paid for alternative assets by reviewing manager fees at least annually. Fee structures could incorporate fixed fees, performance-based fees, high water marks, waterfall, hurdles, floors and caps. The System may also incorporate multi-year performance periods with clawbacks as needed.

Appendix K: Private Markets Overview

Purpose

The purpose of Private Markets is to get exposure to investment strategies that are not available in public markets, thereby capturing an illiquidity premium. The factor exposures will be comparable to those of public markets primarily growth, supplemented by credit and inflation. Private Markets falls within the Growth section of the functional asset allocation. The sub asset classes are Buyout, Venture Capital, Private Debt, Growth Real Estate, and Private Real Assets.

Objectives

- Be near target Net Asset Value for Private Markets and individual private asset classes.
- Achieve performance consistent with asset allocation assumptions, that justifies use of private markets versus public markets, and demonstrates a level of staff skill.
- Over a long-term (20 year horizon), Private Markets ex Proxy to exceed the net return of global public equities by at least 100 bps.
- Individual investments ranking in the 1st or 2nd quartile of peer universes by strategy type and vintage year.

Key Elements of Strategy

1. Ensure beta exposure by executing pacing plans to meet the strategic asset allocation objectives as consistently as practicable.
2. Follow a rigorous investment due diligence process that can lead to alpha generation.
3. Alignment of interests is critical for the illiquid and long-term nature of private investments.

Disclaimer: All interested parties should, subject to applicable laws, respect the confidentiality of information contained in reports provided in connection with investments. The ILPA Due Diligence Questionnaire (DDQ) reflects the view of the participants involved in the creation thereof as to best practices with respect to fund diligence. However, no limited partner should utilize the DDQ as a substitute for its own determination as to what information such limited partner will need or desire with respect to any particular investment. Further, no representation is made that the DDQ, when provided by general partners to their prospective investor base, will include all desirable information or will be fully inclusive of all information needed for any limited partner to effectively monitor its investments.

Overview

As institutional investors increase their focus on issues related to alignment of interest, governance and transparency with their private equity manager relationships, the level of detail required for their upfront fund diligence process has increased. This increase has resulted in the proliferation of lengthy, customized due diligence questionnaires by many limited partners, general partners, advisors, consultants, placement agents and other industry bodies. These customized DDQs, which have varying content and length, have created an extraordinary administrative burden on all interested parties, including LPs, GPs and placement agents. While differences may exist in the format and particular questions, the customized DDQs are often similar in core areas, but still require an outsized level of effort to complete relative to the differences.

Additionally, to ensure they are cognizant of the industry's best practices, LPs are attentive to the types of diligence questions that their peers are asking. With few available forums dedicated to the sharing of diligence practices, some LPs may not even be aware of the level of detail being provided to their peers regarding a prospective fund.

The search for a more efficient process and to improve information asymmetry prompted ILPA to reach out to GPs, LPs, placement agents and other interested parties to craft a DDQ tool capable of recognizing these benefits for the industry. With adoption of the ILPA DDQ, the outsized resources used to create and process the customized, but often redundant, questions and responses could then be repurposed toward additional transparency, assessment and analysis of results.

Please note that the ILPA DDQ is not intended to be a required document that all GPs must adopt. It is also not a panacea for all LPs' diligence needs. We acknowledge that some variation may still be employed in the industry for a variety of valid reasons. The goal of this tool is to minimize any variations to questions that can be standardized across parties, while allowing for a sub-set of questions unique to a specific LP or GP.

The ILPA DDQ covers the following topics related to fund diligence:

These topics are covered in a series of connected short form (Yes/No) and long form questions that are designed to help shape the direction of a LP's diligence process and provide a roadmap for further engagement with GPs. The ILPA DDQ also includes an Appendix, which provides a list of requested documents and data points that ideally would be provided in any GP's diligence package to supplement the questionnaire.

To further support the updated ILPA DDQ, ILPA has made the following resources available:

- [Summary of Changes](#) – overview of changes between the ILPA DDQ 2.0 and the previous version (ILPA DDQ 1.2 released in 2018)
- [User Guide](#) – replacing the FAQ found in the previous version of the DDQ, the user guide expands upon the frequently asked questions with additional guidance based on questions received during the ILPA DDQ 2.0's public comment period during the second half of 2021. Additionally, a stand-alone user guide may also be updated as new questions arise as the industry adopts the DDQ 2.0. A Glossary has been provided within the ILPA DDQ 2.0 to provide direct guidance on terminology used within this document
- [PRI Limited Partners' Private Equity Responsible Investment DDQ User Guide](#) – additional guidance put together by PRI to support the completion of the ESG section of the ILPA DDQ 2.0

As the private equity industry continues to evolve, ILPA is committed to keeping the DDQ relevant by having a keen eye on emerging practices and norms. While there is not a strict timeline in place, ILPA anticipates doing a review of the DDQ on a more regular cadence, thus eliminating the need for comprehensive updates over long intervals.

If you have any on-going feedback on the DDQ or any questions, please email DDQFeedback@ilpa.org.
