Enterprise Risk Tolerance Assessment

City of San Jose Retirement Plans

Executive summary

This analysis is designed to assist the retirement boards with an understanding of the financial health of the City, as the sponsor to each pension plan.

This presentation may be considered a framework for both

1. Analyzing the appropriate level of investment risk to assume; and
2. Communicating between the City and the Boards with respect to how the investment program is designed.

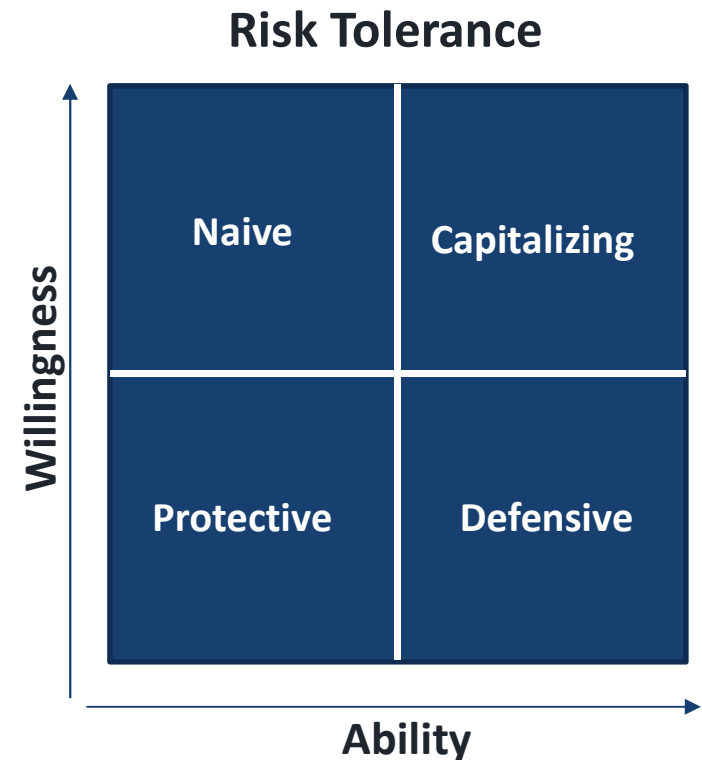

The Police and Fire retirement plan is prepared to accept 12% volatility in its investment program based on the review of the City's financial health, desired investment returns, and financial market forecasts.

The Federated plan will follow a similar analysis but is currently assuming approximately 12% volatility in its investment program.

Fiduciary duties are appropriately recognized such that the Boards' responsibilities are to their respective plan's participants while the City's responsibilities are to its taxpayers.

Enterprise Risk Tolerance in Context

- Properly assessing Enterprise Risk Tolerance has important and practical implications for investment strategy development.
- It involves assessing the Plan's ability and the Board's willingness to accept risk.
- Although the Board's fiduciary duty is to the beneficiaries of the Plans, understanding the City's financial situation impacts its ability to make contributions and cannot be overlooked.
- Similar to the Board's willingness and ability to accept risk, the City itself faces a similar challenge in understanding its willingness and ability to accept risk.

Peer group for comparisons

A peer group has been created to help assess San Jose's financial health relative to other comparable cities.

The peer group has been created using two sub-groups:

- The 4 largest cities in California, excluding San Jose
- 4 other cities outside of California with the following characteristics:
 - High growth
 - Retirement system separate from a state/multi-employer system
 - Comparable population size

As a result, the peer group is as follows:

- Within California: Fresno, Los Angeles, San Diego, San Francisco
- Outside California: Dallas, Denver, San Antonio, Seattle

Credit ratings

- The City of San Jose has been assigned high general credit ratings from all 3 national rating agencies:
 - Moody's Aa1 (2 of 21); stable outlook
 - S&P AA+ (2 of 20); stable outlook
 - Fitch AA+ (2 of 20); stable outlook
- *The ratings continue to reflect the diversity of the local economy anchored by a strong technology presence and sound financial management and prudent budgetary practices.*

City	Moody's	Funded Ratio	Actuarial Value of Assets (\$mm)	Population	Government Revenues (\$mm)	Revenue per Capita
San Jose	Aa1	76% P&F; 54% Fed	\$3,297 P&F / \$2,035 Fed	1,046,000	\$1,526	\$1,459
Dallas	A1	49% P&F; 80% ERS	\$2,158 P&F / \$3,451 ERS	1,270,170	\$1,678	\$1,321
Denver	Aaa	72%	\$2,169	693,060	\$1,954	\$2,820
Fresno	A3	120% P&F; 113% ERS	\$1,355 P&F / \$1,145 ERS	525,832	\$435	\$828

Sources: City of San Jose Comprehensive Annual Financial Report 2017; each respective City's CAFR as of the FY End date in the table. Credit rating agencies ratings as of June 30, 2017.

Note: Dallas and Fresno hold outstanding Pension Obligation Bonds of \$257,623,000 and \$131,380,000, respectively.

Calibrating our unique position: Strengths

After discussing which City-level metrics should be included in developing the Plan's risk profile, the Board identified the following strengths & weaknesses that should be considered and communicated with the City.

A review of the Enterprise Risk Tolerance analysis noted the following Strengths:

Consideration	Rationale
Credit ratings	Top 2 rating from each of 3 national rating agencies
Strong balance sheet	Total assets = 1.7 x Total liabilities
Good demographics & trends	0.8% annualized population growth; increasing value of taxable property; declining unemployment rate;
Forecasted General Fund growth in revenues > growth in expenses	-0.8% growth in revenues > -2.5% growth in expenses
History of improving net activity	4.2% CAGR of revenues over past 5 years vs. 2.6% CAGR of expenses over same period
Favorable economic environment	Diversified employment by industry; global tech sector hub; broad domestic economic growth

Calibrating our unique position: Challenges

And the Enterprise Risk Tolerance analysis also noted the following Challenges:

Consideration	Rationale
Funded status	77% for Police & Fire; ~50% for Federated
Interest on UAL	36% of payroll for FYE 2019 vs. normal cost of 38.5%
Growth of contributions	31% of FYE 2020 general fund revenues
City continues to run a deficit	Since 2012, cumulative change in net position = -\$894mm
Relative size of pension obligations	Combined actuarial assumed liabilities have grown from 3.3 to 5.5 x Governmental Revenues
Employees' ability to pay	High cost of living area; Sponsor's responsibility for unfunded liability

Appendix

Long-term obligations

- The City's legal general obligation bonded debt limit, per City Charter, is 15% of the value of taxable property (taxable property is also commonly referred to as assessed value) within the City limits.
- With the City's assessed value at \$166.5 billion, the legal debt limit is approximately \$25.0 billion.
- Total general obligation debt outstanding for the City is valued at \$362.4 million, representing 1.4% of the debt limit, well under the legal limit.

LONG-TERM DEBT BY BOND TYPE (IN \$000'S)

LONG-TERM DEBT BY ACTIVITY TYPE (IN \$000'S)

Sources: City of San Jose Comprehensive Annual Financial Report 2017

Outstanding debt

DEBT TO ASSESSED PROPERTY (%)

DEBT TO ANNUAL GOVERNMENT REVENUES (%)

Debt, relative to assessed value of property and governmental revenues, ranks 3rd.

This indicates a reasonable level of leverage.

As of the FY End date for each city noted on page 6.

Sources: City of San Jose Comprehensive Annual Financial Report 2017; each respective City's CAFR as of the FY End date noted on page 6.

Debt service

Annual debt service (interest and principal), relative to the general fund balance and governmental revenues, ranks 4th and 5th, respectively.

This indicates servicing debt is not a major financial strain relative to peers.

DEBT SERVICE TO GENERAL FUND BALANCE (%)

DEBT SERVICE TO GOVERNMENTAL REVENUES (%)

As of the FY End date for each city noted on page 6.

Sources: City of San Jose Comprehensive Annual Financial Report 2017; each respective City's CAFR as of the FY End date noted on page 6.

Liabilities vs. governmental revenue

HISTORICAL TREND

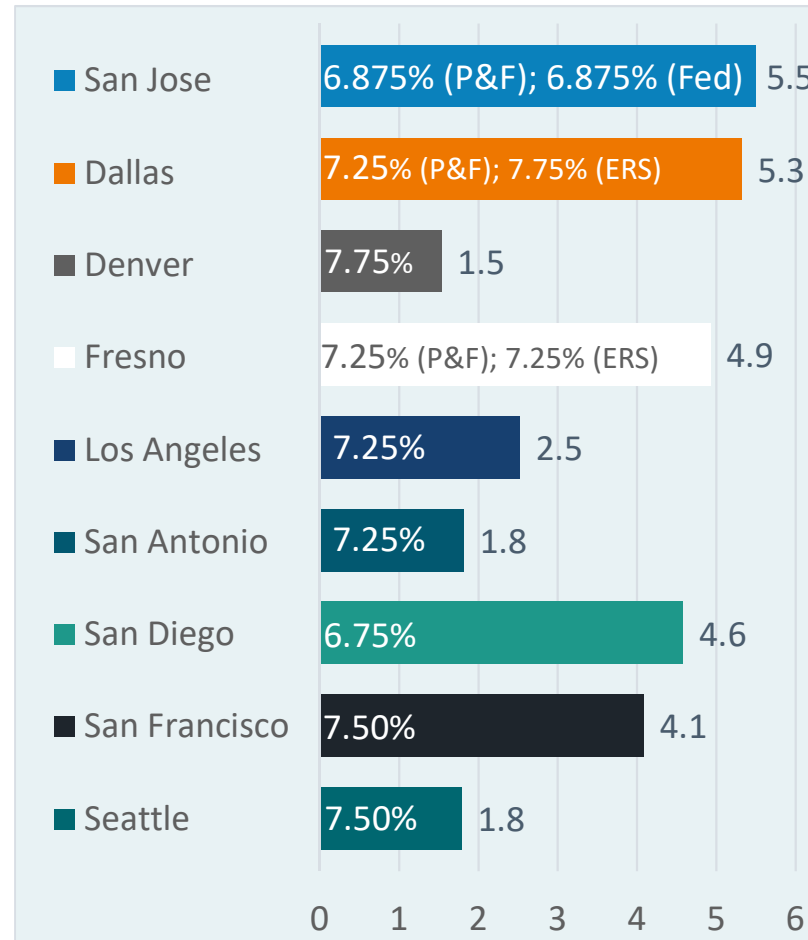

As of the FY End date for each city noted on page 6.

Sources: City of San Jose, Federated Employees', Police & Fire Comprehensive Annual Financial Reports (2017-2008); each respective City's CAFR as of the FY End date noted on page 6.

*2008 actuarial liabilities are estimated as an average of 2007 and 2009 values.

COMPARED TO PEERS

Combined pension liabilities, relative to governmental revenues, ranks among the highest.

Since liability is a function of discount rate, it is important to note that San Jose has the second lowest discount rate.

Liabilities vs. annual payroll

HISTORICAL TREND

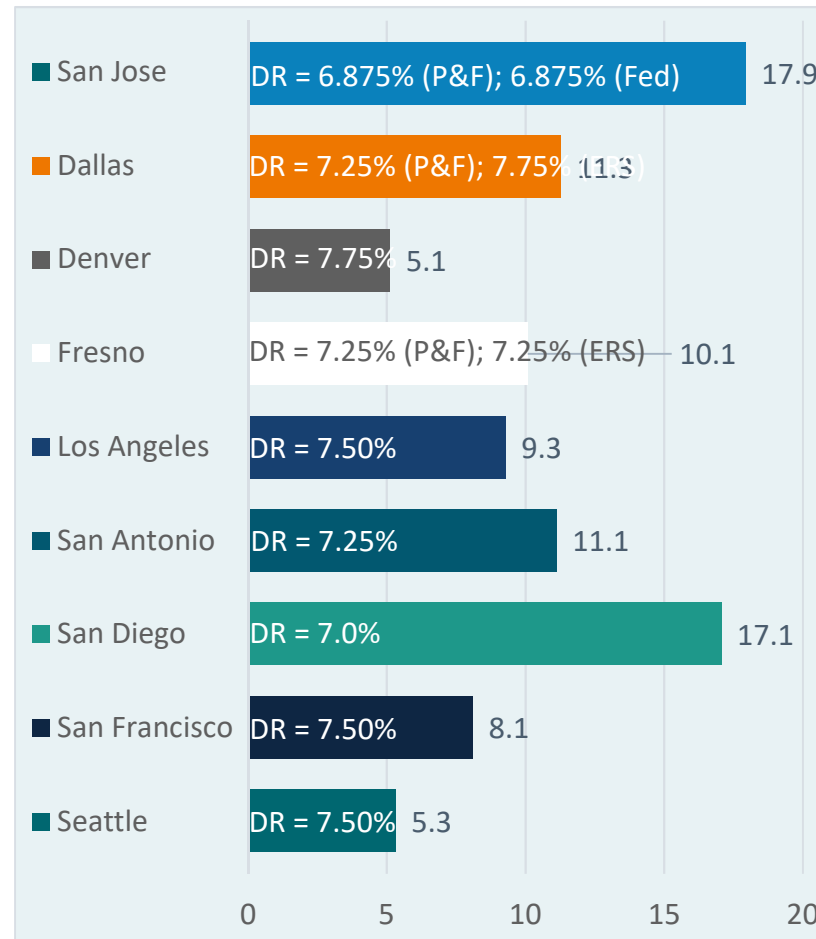

As of the FY End date for each city noted on page 6.

Sources: City of San Jose, Federated Employees', Police & Fire Comprehensive Annual Financial Reports (2016-2008); each respective City's CAFR as of the FY End date noted on page 6.

*Due to lack of 2008 actuarial valuations, liabilities are estimated as an average of 2007 and 2009 values.

COMPARED TO PEERS

Combined pension liabilities, relative to covered payroll, ranks the highest.

Again, part of this is a function of having the lowest discount rate.

Contributions vs. general fund revenues

HISTORICAL TREND

COMPARED TO PEERS

On both an absolute and as a percentage of general fund revenues, total contributions has trended upwards and ranks the highest.

Contributions have increased as funded status has deteriorated, particularly in the Federated Plan.

As of the FY End date for each city noted on page 6.

Sources: City of San Jose Comprehensive Annual Financial Reports (2017-2008); each respective City's CAFR as of the FY End date noted on page 6.

Economic & demographic statistics

- With the exception of 2010, the population growth has been relatively stable over the last 10 years, averaging about 0.7%.
- Taxable property per capita has been trending upwards and is currently at \$154,309, well above its' 10-year average of \$130,000.
- The unemployment rate has improved from the highs between 2010-2011 and is currently at 3.6%, well below its' 10-year average of 7.7%.

POPULATION GROWTH (%)

TAXABLE PROPERTY

UNEMPLOYMENT RATE (%)

Sources: City of San Jose Comprehensive Annual Financial Reports (2017-2009)

Employment by industry

EMPLOYMENT BY INDUSTRY (%)

The City of San Jose has a diverse employment base, with the 3 largest sectors each making up over 18% of the base.

Roughly Two-Thirds of the Manufacturing and Professional Services industries are related to the tech sector, accounting for approximately 23% of the total employment.

Ability to accept risk

Combining investment program risk with additional modeling from Cheiron, the following table summarizes the extent to which the Plan is willing to accept risk

Metric	Description	Measurement	Risk Limit
Funded Ratio	Expecting the plan's funded ratio to reach 100% over a 15-year period but not to fall below 60% with a high degree of certainty (i.e. >95%)	Actuarial Funded Ratio	60%
Contributions	Plan contributions from the City to fluctuate through time but not to exceed \$335M in any given year	Total plan contributions measured in Dollars	\$335M
Interest Cost	Expecting the interest on the current Unfunded Actuarial Liability to remain below \$150M	Interest Cost measured in Dollars	\$150M

Moody's Credit Ratings

Aaa	Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.
Aa	Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
A	Obligations rated A are considered upper-medium grade and are subject to low credit risk.
Baa	Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.
Ba	Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.
B	Obligations rated B are considered speculative and are subject to high credit risk.
Caa	Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.
Ca	Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
C	Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P Credit Rating Definitions

Long-Term Issuer Credit Ratings*	
Category	Definition
AAA	An obligor rated 'AAA' has extremely strong capacity to meet its financial commitments. 'AAA' is the highest issuer credit rating assigned by Standard & Poor's.
AA	An obligor rated 'AA' has very strong capacity to meet its financial commitments. It differs from the highest-rated obligors only to a small degree.
A	An obligor rated 'A' has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories.
BBB	An obligor rated 'BBB' has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments.
BB; B; CCC; and CC	Obligor rated 'BB', 'B', 'CCC', and 'CC' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'CC' the highest. While such obligors will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.
BB	An obligor rated 'BB' is less vulnerable in the near term than other lower-rated obligors. However, it faces major ongoing uncertainties and exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitments.
B	An obligor rated 'B' is more vulnerable than the obligors rated 'BB', but the obligor currently has the capacity to meet its financial commitments. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments.
CCC	An obligor rated 'CCC' is currently vulnerable, and is dependent upon favorable business, financial, and economic conditions to meet its financial commitments.
CC	An obligor rated 'CC' is currently highly vulnerable. The 'CC' rating is used when a default has not yet occurred, but Standard & Poor's expects default to be a virtual certainty, regardless of the anticipated time to default.
R	An obligor rated 'R' is under regulatory supervision owing to its financial condition. During the pendency of the regulatory supervision the regulators may have the power to favor one class of obligations over others or pay some obligations and not others.
SD and D	An obligor rated 'SD' (selective default) or 'D' is in default on one or more of its financial obligations including rated and unrated financial obligations but excluding hybrid instruments classified as regulatory capital or in non-payment according to terms. An obligor is considered in default unless Standard & Poor's believes that such payments will be made within five business days of the due date in the absence of a stated grace period, or within the earlier of the stated grace period or 30 calendar days. A 'D' rating is assigned when Standard & Poor's believes that the default will be a general default and that the obligor will fail to pay all or substantially all of its obligations as they come due. An 'SD' rating is assigned when Standard & Poor's believes that the obligor has selectively defaulted on a specific issue or class of obligations but it will continue to meet its payment obligations on other issues or classes of obligations in a timely manner. An obligor's rating is lowered to 'D' or 'SD' if it is conducting a distressed exchange offer.
NR	An issuer designated 'NR' is not rated.

*The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.
