The most common solutions revolve around increasing employee and employer contributions, reducing benefits, and converting lifetime guarantee of defined benefit pensions into do it yourself pension schemes.

This forum will examine the obstacles that stand in the way of closing public pension funding gap and explore new solutions to overcome such obstacles, including better risk management in economic cycles, use of new and improved debt instruments, and closing tax loopholes.

While in the short term, the Covid-19 pandemic has focused attention on restoring public health and preserving the economy, the crisis has also raised awareness of the need to boost the green economy and build resilience ahead of another impending crisis: climate change. Meanwhile, with increasing evidence that investments that take climate stewardship into account can achieve superior financial performance, asset owners are pushing both the companies in their portfolios and the asset managers who manage those portfolios to develop strategies that reflect pressing climate realities. This conference will discuss the role the investment community can play in unleashing the financial flows that are urgently needed if we are to recover from the Covid-19 crisis while also avoiding the worst effects of climate change.
