Private Equity Global Fundraising¹

Fundraising activity for private equity funds in the first quarter of 2021 decreased compared to the previous quarter, with \$188.5 billion raised, but still marked the highest fundraising total for Q1 over the last five years and was up 16% from the same period in 2020. The number of fund closings also increased 5%, to 452 funds, relative to Q1 2020. The immediate impact of COVID-19 on global financial markets appears to have prompted some investors to reassess their allocations to private equity in 2020, but fundraising has largely recovered in the past two quarters. That said, the annual growth rate of private equity fundraising has been declining since 2017, and a longer-term slowdown could be the prevailing trend. Fundraising also demonstrated signs of further capital consolidation with larger, more established managers gradually increasing their market share. The average size of funds still in the market has been declining, indicating that smaller funds are hardest hit by the challenging conditions and have had difficulty establishing new LP relationships.

¹ Preqin

Purchase Price Breakdown, All LBOs¹

Dry Powder by Fund Type²

Private equity purchase price multiples in the first quarter of 2021 increased compared to 2020 and were at an all-time high of 11.9x EBITDA. Equity contribution (relative to total purchase price) decreased slightly to 48%, causing total purchase prices to comprise slightly more debt than equity. Elevated prices during the first quarter were supported by a continued record level of dry powder, which surpassed the year-end level in 2020. Dry powder levels will remain high as long as more capital is being raised than is being deployed, and investors may expect to continue to see high purchase prices as a result of the high levels of capital competing for deals.

¹ S&P

² Preqin

Capital Raised by Strategy¹

Capital Raised by Geography²

Buyout funds continued to be the most popular private equity sub-strategy category, despite a decrease from 44% of all private equity capital raised in 2020 to 37% dedicated to Buyout funds in the first quarter of 2021. Alternatively, Venture Capital strategies, as a percentage of total capital raised, increased from 2020, rising from 21% to 24% in the first quarter of 2021. Growth Equity funds also increased from 11% to 13%. Secondaries strategies experienced a decrease in capital raised from 13% in 2020 to 8% in the first quarter of 2021. Other Private Equity, which includes co-investment and hybrid vehicles, increased from 3% in 2020 to 9% in Q1 2021. Fund of Funds stayed relatively consistent through the first quarter.

North America-focused vehicles continued to be a majority of all funds raised during the first quarter, representing 60% of capital raised. This is relatively consistent with the prior year, despite private equity investors favoring commitments to Europe in Q3 2020, as the COVID-19 pandemic disproportionately affected North America in fundraising totals during the middle of last year. The geographic diversification in fundraising totals during the first quarter of 2021 closely mirrored that of 2020 with Europe-focused funds remaining at 22% of capital raised, Asia-focused funds decreasing slightly from 15% to 13%, and Rest of World rising from 4% to 5%. Overall, private equity investors continued to favor commitments to developed markets in North America- and Europe-focused funds over Asia and Rest of World during the first quarter of 2021.

² Preqin

Private Equity Performance by Horizon¹

Horizon	Private Equity	Buyout	Venture Capital	Growth Equity
1 Year to 3/2021	58.5%	47.0%	81.9%	63.8%
3 Years to 3/2021	22.9	17.9	32.9	25.7
5 Years to 3/2021	20.0	17.8	23.6	21.6
10 Years to 3/2021	15.2	13.7	19.0	16.0

Private Equity Performance by Vintage Year²

Recent private equity returns have been very strong, with all Private Equity generating a 58.5% IRR over the past year following the outbreak of the COVID-19 pandemic in Q1 2020 and write-downs across most portfolios at that time related to the associated uncertainty. One-year performance of Venture Capital was particularly impressive, at an 81.9% IRR. In general, performance has been strong in each vintage year since the Global Financial Crisis. Buyout and Venture Capital funds have generally both performed well over the various horizons on an absolute basis, with Venture funds significantly outperforming Buyout funds over the one-year and three-year time horizons. The spread between first and third quartile performance in private equity has grown consistently since the Global Financial Crisis; 2007 vintage funds reported a 12.5% spread while 2019 vintage funds reported a 42.1% spread.

¹ Cambridge Associates Published Global Pooled Returns as of 3/31/2021.

² Cambridge Associates Published Global Quartile Returns as of 3/31/2021.

Private Debt

Credit markets continued to rally in the first quarter. High yield spreads finished the quarter at 310 basis points, significantly tighter than the wide levels of approximately 880 basis points one year prior. High yield bonds continue to touch new historic yield lows as the market yield-to-worst finished the quarter at 4.3%.

Default activity remained muted in the first quarter.

¹ Source: Barclays Capital

² Source: JP Morgan

Distressed & Opportunistic Debt

Lower Rated Debt Yield¹

Distressed Ratio²

The yields on lower rated debt continued to trend downward and remain near historical low levels. The distressed ratio remains near historic lows. Most stressed and opportunistic investment opportunities continue to be in industries directly impacted by the COVID-19 pandemic such as travel, lodging, and certain consumer segments.

¹ Source: St. Louis FRED data.

² Source: Bank Loans trading below \$80, Credit Suisse; High Yield trading at spread of more than 1,000bps, Deutsche Bank.

Secondary market pricing of middle market and large cap loans remained largely unchanged during the quarter, while BDCs continued to recover. The middle market loans trading at a discount tend to be those in industries that have struggled most as a result of the COVID-19 pandemic. It is also important to note that the Refinitiv/LPC universe is only a subset of the overall private middle market loan universe.

¹ Source: Refinitiv LPC.

Global Quarterly Unlisted Natural Resource Fundraising¹

Fundraising during the first quarter of 2021 was more robust than prior quarters following the global pandemic. During the quarter, approximately \$30 billion was raised across 38 funds with the average fund size raised averaging approximately \$0.8 billion of commitments. As of March 31, 2021, Preqin reported a total of 373 unlisted natural resources funds with a combined fundraising target of approximately \$201 billion. The majority of natural resources managers fundraising during the first quarter were focused on North America, accounting for over half of cumulative targeted capitalization in the market.

¹ Source: Preqin Private Capital Fundraising Update, Q1 2021.

Oil prices ended the quarter at \$62 per barrel representing a 33% increase from the prior quarter and a 113% increase from one year prior. The increase was aided by modest increases in demand and constrained production in the U.S. Also during the quarter, the Suez Canal, a major shipping channel for goods and energy in the Middle East, was blocked for almost a week as a result of a stuck cargo ship. During the quarter, the active U.S. oil rig count increased by 55 to 315. International oil, as represented by Brent prices, increased by 30% to \$65 per barrel. U.S. gasoline prices for regular blend increased by 26% to \$3.00 per gallon during the quarter.

Extracted Resources¹ Natural Gas Price vs. Active US Rigs

A significant weather event caused a freeze in Texas that caused several power generating facilities to go offline, including wind and natural gas, just as electrical demand surged to warm homes. As a result, the ERCOT power grid temporarily failed, and natural gas spot prices spiked. Henry Hub gas prices ended February at \$5.35/MM BTU but subsequently fell to \$2.62 by the end of the quarter. Relative to one year prior, natural gas prices are up 46%. During the quarter, the U.S. natural gas rig count increased by 12 to 92. Total U.S. natural gas production averaged almost 97 billion cubic feet per day, a slight decrease relative to the prior two quarters.

¹ Source: EIA and Baker Hughes.

Electric vehicles and the emphasis on energy transition and renewable energy contributed to a stronger mining sector, in general. Certain metals and minerals used in renewable energy projects and electric vehicles are expected to be beneficiaries of increased demand longer term. Gold prices ended the quarter at approximately \$1,718 per ounce representing a quarterly decrease of 8% and an 8% increase from one year prior. Copper prices ended the quarter at \$4.08 per pound representing a 16% increase for the quarter and a 73% increase from one year prior.

¹ Source: World Bank.

Harvested Resources Wheat, Corn, & Soybean¹

Following several natural disasters that occurred in prior quarters across the U.S., grain prices began to strengthen at the end of 2020 and into the first quarter of 2021. During the quarter, wheat, corn, and soybean prices increased by 9%, 23%, and 15%, respectively. Relative to one year prior, the grains were up by 19%, 51%, and 57%, respectively. The NCREIF Farmland index increased by 0.9% during the quarter primarily driven by income returns of 0.8%.

¹ Source: World Bank.

Harvested Resources US South Timber Prices¹

Significant increases in demand from new home construction and remodeling activity helped boost prices for cut wood products such as lumber and panels. However, limited mill capacity and an oversupply of logs in the U.S. South did not translate into increased prices for sawlogs. U.S. South average timber prices for sawtimber and chip-n-saw have remained fairly consistent over the past several years, while pulpwood experienced more volatility. Hardwood pulpwood experienced a quarterly increase of 11.9% but was down 4.6% for the trailing one year period. Pine pulpwood increased 5.1% during the first quarter and generated a 3.3% increase over the past year. Pine sawtimber prices were relatively stable increasing by 2.7% and 2.5% during the quarter and one year period, respectively. The quarterly NCREIF Timberland index increase of 0.8% was driven by income returns of 0.9%.

¹ Source: Bloomberg and TimberMart South.

Global Quarterly Unlisted Infrastructure Fundraising¹

Capital raised in the first quarter of 2021 was less than the fourth quarter of 2020 and half of the capital raised in the first quarter 2019. The average fund raised so far in 2021 is \$790 million, which is less than the 2020 average of \$920 million. As of March 31, 2021, a total of 286 unlisted infrastructure funds were in market, according to Preqin, with a combined fundraising target of approximately \$235 billion.

¹ Source: Preqin 2021 Global Infrastructure Report.

Moving 12-month Total on All US Roads¹

The first quarter was far below pace for travel on US roads, with a total of approximately 690 billion miles. This represented a decrease of 2% over the same period in 2020. That said, the travel data is trending back to higher values, indicating a natural return to travel as COVID-19 restrictions continue to loosen.

Up to this point in 2021, the average US price of a gallon of gas went down to a monthly average of \$2.64 per gallon, with a peak of \$2.90. This compares to \$2.26 and \$2.64 seen in 2019, respectively.

US Port Activity – Container Trade in TEUs¹

The chart presents the top three US ports by container volume, as measured by twenty-foot equivalent units (TEU). Activity at the three ports provides a high-level representation of the volume at US ports more broadly.

During the first quarter of 2021, volumes at the three ports increased by 1.7 million units relative to the same period in 2020. On a year-over-year basis, the combined port volumes increased by 2.5 million TEU, or 11.8%, over the prior 12-month period. The Port of Long Beach recorded an increase of 17.3% (1.3 million TEU), the Port of NY/NJ reported an increase of 3.3% (0.2 million TEU) and the Port of Los Angeles recorded an increase of 12.1% (1.1 million TEU) over the prior 12 months.

Total US Domestic and International Flights¹

The chart above presents all US domestic and international flights, excluding foreign point-to-point flights by month. Air traffic is cyclical with peaks in the summer months and troughs in the winter months.

There were 0.9 million fewer flights during the first quarter of 2021, representing a 38% decrease compared to the same period in 2020. Air traffic activity decreased by 52% over the 12-month period ended March 31, 2021 over the previous period. In addition to the number of flights during the first quarter decreasing year-over-year, the total number of passengers travelling on US and international airlines decreased by 70% from 2020 to 2021 with the lowest level of international travelers since 2003.

¹ Source: Bureau of Transportation Statistics: Flights, All US, and Foreign Carriers.

Total US Power Generation¹

The graph above presents the total net generation for the past 12 months compared to the 10-year average for each month. Over the past year, power generation was below the 10-year average in eight out of 12 months. Net energy generation in the US decreased by 2.8% during the first quarter, compared to the same period in 2020. For the 12-month period ended March 31, 2021, net energy generation decreased by 1.3% over the previous 12 months.

¹ Source: US Energy Information Administration: Electric Power Monthly, March 2021.

US Power Generation by Source¹

Three power generation sources in the US—coal, wind, and solar—increased 35%, 11%, 31%, respectively, in the first quarter of 2021 (versus the same period in the previous year). Generation from natural gas, nuclear, and hydroelectric conventional dropped by 11%, 3%, and 3%, respectively, during the same period. Wind and utility-scale solar continue to make up a small portion of total net energy generation in the US, accounting for only 10% and 2% of energy generation in the first quarter, respectively, while coal, natural gas, and nuclear accounted for 23%, 35%, and 20%, respectively. However, the growth of wind and solar as sources of energy generation continues to increase at a faster rate than coal and natural gas, especially over the last couple of years.

¹ Source: US Energy Information Administration: Electric Power Monthly, March 2021.

Real Estate Fundamentals Vacancy by Property Type¹

In the first quarter of 2021, vacancy rates increased for all property types except multifamily. Multifamily vacancies decreased by 89 basis points in the first quarter after reaching 8.0% in the fourth quarter of 2020. Industrial vacancies appeared to have bottomed just above 3.0% and is currently tracking at 3.5%. Office and retail have seen sharp increases in vacancy due to the COVID-19 pandemic. All property types had vacancies that increased over the trailing twelve months. Compared to one year ago, vacancy rates in multifamily increased 72 basis points, office increased 226 basis points, industrial increased 5 basis points, and retail increased 235 basis points. Overall, the vacancy rate across all properties increased 95 basis points from Q1 2020.

¹ Source: NCREIF.

The trailing twelve-month rate of NOI growth increased slightly in Q1 2021 to -5.5%. The ongoing COVID-19 pandemic has negatively impacted commercial property operations as operating expenses have not declined in response to the shutdown when compared to revenues, particularly for retail and urban multifamily properties. Industrial NOI growth has remained relatively flat, currently trending at 6.8% for the trailing year ending Q1 2021 (down 149 basis points from a year ago). Office NOI growth trended up to 2.9% year-over-year, and Apartment NOI (a sector with “gross” rents, compared to “net” rents in other property types experienced negative NOI growth at 14.0% year-over-year. Retail NOI growth has improved slightly from the previous three quarters, now at -17.2% year-over-year.

¹ Source: NCREIF

Transaction Volume (\$bn)¹

Private real estate transaction volume for properties valued over \$2.5 million for Q1 2021 was down considerably from Q1 2020 to \$102.3 billion. Compared to a year ago, hotel (+22.4%) saw an increase in transaction volume, while office (-32.2%), industrial (-34.1%), multifamily (-2.3%), retail (-31.6%), and land (-31.0%) experienced a decline in transaction volume. Multifamily and industrial properties made up the largest percentages of total transaction volume during the quarter, at 38% and 22%, respectively.

¹ Source: PREA

Real Estate Capital Markets Cap Rates vs. 10-Year Treasury¹

The NPI Value Weighted Cap Rate increased 10 basis points in Q1 2021 to 4.1%. The 10-year Treasury yield increased by 81 basis points in Q1 2021 from the previous quarter, but is still well below historical yields. The spread between cap rates and treasury yields (235 basis points) is now below the long-term average spread of 251 basis points.

Trailing Period Returns¹

<i>As of March 31, 2021</i>	1 Year	3 Years	5 Years	10 Years
NFI-ODCE (EW, net)	2.1%	4.4%	5.6%	8.9%
NFI-ODCE (VW, net)	1.5	4.0	5.3	8.7
NCREIF Property Index	2.6	4.9	5.8	8.8
NAREIT Equity REIT Index	34.2	10.6	7.1	9.3

Private real estate indices were positive in Q1 2021 and continue to be positive over the 1-year, 3-year, 5-year, and 10-year time horizons. Public real estate performance in 2020 and into 2021 has been volatile, returning 8.3% in Q1 2021, after posting a negative return (-5.1%) over the course of 2020.

¹ Source: NCREIF

ODCE Return Components¹ (Equal Weight, Net)

The NFI-ODCE Equal Weight return for Q1 2021 was positive at 2.1%, posting the highest quarterly return since Q1 2016. The income component of the quarterly return increased slightly to 0.9%, and appreciation for the quarter was strong at 1.2%.

Below are details on specific terminology and calculation methodologies used throughout this report:

Committed	The original commitment amount made to a given fund. Some funds may be denominated in non-USD currencies, and such commitment amounts represent the sum of fund contributions translated to USD at their daily conversion rates plus the unfunded balance translated at the rate as of the date of this report.
Contributed	The amount of capital called by a fund manager against the commitment amount. Contributions may be used for new or follow-on investments, fees, and expenses, as outlined in each fund's limited partnership agreement. Some capital distributions from funds may reduce contributed capital balances. Some funds may be denominated in non-USD currencies, and such aggregate contributions represent the sum of each fund contribution translated to USD at its daily conversion rate.
Distributed	The amount of capital returned from a fund manager for returns of invested capital, profits, interest, and other investment related income. Some distributions may be subject to re-investment, as outlined in each fund's limited partnership agreement. Some funds may be denominated in non-USD currencies, and such aggregate distributions represent the sum of each fund distribution translated to USD at its daily conversion rate.
DPI	Acronym for "Distributed-to-Paid-In", which is a performance measurement for Private Market investments. The performance calculation equals Distributed divided by Contributed. DPIs for funds and groupings of funds are net of all fund fees and expenses as reported to by fund managers to Meketa.
Exposure	Represents the sum of the investor's Unfunded and Remaining Value.
IRR	Acronym for "Internal Rate of Return", which is a performance measurement for Private Market investments. IRRs are calculated by Meketa based on daily cash flows and Remaining Values as of the date of this report. IRRs for funds and groupings of funds are net of all fund fees and expenses as reported by fund managers to Meketa.
NCV	Acronym for "Net Change in Value", which is a performance measurement for Private Market investments. The performance calculation equals the appreciation or depreciation over a time period neutralized for the impact of cash flows that occurred during the time period.
NM	Acronym for "Not Meaningful", which indicates that a performance calculation is based on data over too short a timeframe to yet be meaningful or not yet possible due to inadequate data. Meketa begins reporting IRR calculations for investments once they have reached more than two years since first capital call. NM is also used within this report in uncommon cases where the manager has reported a negative Remaining Value for an investment.

Peer Universe

The performance for a set of comparable private market funds. The peer returns used in this report are provided by Thomson ONE, based on data from Cambridge Associates as of the date of this report. Program-level peer universe performance represents the pooled return for a set of funds of corresponding vintages and strategies across all regions globally. Fund-level peer performance represents the median return for a set of funds of the same vintage and the program's set of corresponding strategies across all regions globally. Data sets that include less than five funds display performance as "NM". Meketa utilizes the following Thomson ONE strategies for peer universes:

Infrastructure: Infrastructure

Natural Resources: Private Equity Energy, Upstream Energy & Royalties, and Timber

Private Debt: Subordinated Capital, Credit Opportunities, Senior Debt, and Control-Oriented Distressed

Private Equity (including Private Debt): Venture Capital, Growth Equity, Buyout, Subordinated Capital, Credit Opportunities, Senior Debt, and Control-Oriented Distressed

Private Equity (excluding Private Debt): Venture Capital, Growth Equity, and Buyout

Real Assets (excluding Real Estate): Infrastructure, Private Equity Energy, Upstream Energy & Royalties, and Timber

Real Assets (including Real Estate): Infrastructure, Private Equity Energy, Upstream Energy & Royalties, Timber, and Real Estate

Real Estate: Real Estate

Public Market Equivalent ("PME")

A calculation methodology that seeks to compare the performance of a portfolio of private market investments with public market indices. The figures presented in this report are based on the PME+ framework, which represents a net IRR value based on the actual timing and size of the private market program's daily cash flows and the daily appreciation or depreciation of an equivalent public market index. Meketa utilizes the following indices for private market program PME+ calculations:

Infrastructure: Dow Jones Brookfield Global Infrastructure Index

Natural Resources: S&P Global Natural Resources Index

Private Debt: Barclays Capital U.S. Corporate High Yield Bond Index

Private Equity: MSCI ACWI Investable Market Index

Real Assets (excluding Real Estate): Equal blend of Dow Jones Brookfield Global Infrastructure Index and S&P Global Natural Resources Index

	<p>Real Assets (including Real Estate): Equal blend of Dow Jones Brookfield Global Infrastructure Index, S&P Global Natural Resources Index, and Dow Jones U.S. Select Real Estate Securities Index</p> <p>Real Estate: Dow Jones U.S. Select Real Estate Securities Index</p>
<p>Remaining Value</p>	<p>The investor's value as reported by a fund manager on the investor's capital account statement. All investor values in this report are as of the date of this report, unless otherwise noted. Some funds may be denominated in non-USD currencies, and such remaining values represent the fund's local currency value translated to USD at the rate as of the date of this report.</p>
<p>TVPI</p>	<p>Acronym for "Total Value-to-Paid-In", which is a performance measurement for Private Market investments. The performance calculations represents Distributed plus Remaining Value, then divided by Contributed. TVPIs for funds and groupings of funds are net of all fund fees and expenses as reported to by fund managers to Meketa.</p>
<p>Unfunded</p>	<p>The remaining balance of capital that a fund manager has yet to call against a commitment amount. Meketa updates unfunded balances for funds to reflect all information provided by fund managers provided in their cash flow notices. Some funds may be denominated in non-USD currencies, and such unfunded balances represent the fund's local currency unfunded balance translated to USD at the rate as of the date of this report.</p>

The data are provided for informational purposes only, may not be complete, and cannot be relied upon for any purpose other than for discussion.

Meketa Investment Group has prepared this report on the basis of sources believed to be reliable. The data are based on matters as they are known as of the date of preparation of the report, and not as of any future date, and will not be updated or otherwise revised to reflect information that subsequently becomes available.

If we manage your assets on a discretionary basis, please contact us if there are any changes in your financial situation or investment objectives, or if you want to impose any reasonable restrictions on our management of your account or reasonably modify existing restrictions.

In general, the valuation numbers presented in this report are prepared by the custodian bank for listed securities, and by the fund manager or appropriate General Partner in the case of unlisted securities. The data used in the market comparison sections of this report are sourced from various databases. These data are continuously updated and are subject to change.

This report does not contain all the information necessary to fully evaluate the potential risks of any of the investments described herein. Because of inherent uncertainties involved in the valuations of investments that are not publicly traded, any estimated fair values shown in this report may differ significantly from the values that would have been used had a ready market for the underlying securities existed, and the differences could be material.

This document may contain certain forward-looking statements, forecasts, estimates, projections, and opinions ("Forward Statements"). No representation is made or will be made that any Forward Statements will be achieved or will prove to be correct. A number of factors, in addition to any risk factors stated in this material, could cause actual future results to vary materially from the Forward Statements. No representation is given that the assumptions disclosed in this document upon which Forward Statements may be based are reasonable. There can be no assurance that the investment strategy or objective of any fund or investment will be achieved, or that the client will receive a return of the amount invested.

In some cases Meketa Investment Group assists the client in handling capital calls or asset transfers among investment managers. In these cases we do not make any representations as to the managers' use of the funds, but do confirm that the capital called or transferred is within the amounts authorized by the client.

Because there is no readily accessible market for private markets assets (companies and partnerships), the values placed on private markets assets are calculated by General Partners using conservative and industry standard pricing procedures. Annually, an independent auditor reviews the pricing procedures employed by the General Partner of each partnership.

The values of companies and partnerships are audited at year-end, and are not audited at other quarter-end periods. While financial information may be audited, there is some discretion as to the method employed to price private companies and, therefore, private markets partnerships. At all times, Meketa Investment Group expects General Partners to utilize conservative and industry standard pricing procedures, and requires the General Partners to disclose those procedures in their reports. However, because of the inherent uncertainty of valuation, these estimated values may differ from the values that would be used if a ready market for the investments existed, and the differences could be significant.
