TOTAL COMPENSATION STUDY DRAFT REPORT

City of San Jose Office of Retirement Services

Gallagher

Insurance | Risk Management | Consulting

Formerly Koff & Associates

February 12, 2026

Mr. John Flynn
Chief Executive Officer
City of San Jose Office of Retirement Services
1737 North First Street, Suite 600
San Jose, CA. 95112

Dear Mr. Flynn:

Gallagher is pleased to present the Draft Total Compensation Study Report to the City of San Jose's Office of Retirement Services ("Retirement Services"). This report documents the market compensation survey methodology, findings, and recommendations for implementation. The Executive Summary, starting on page 4, provides a high-level summary of findings, while the full technical report starts on page 6.

We would like to thank you for your assistance and cooperation without which this study could not have been brought to its successful completion and will be glad to answer any questions or clarify any points as you are implementing the findings and recommendations. It was a pleasure working with your organization and we look forward to future opportunities to provide you with professional assistance.

Very truly yours,

Debbie Owen
Project Manager

Executive Summary

In October 2025, Retirement Services contracted with Gallagher, formerly Koff and Associates, to conduct a Total Compensation Study. The purpose of the study was to develop a competitive compensation plan that enables Retirement Services to attract and retain top talent, aligns with the organization's strategic objectives, and promotes both internal and external pay equity through the application of objective, quantitative and non-quantitative evaluation criteria.

The labor market for this study included eight (8) agencies and comprised local government retirement systems within California cities and counties, as well as the State of California (CalPERS) which are comparable to Retirement Services in services and programs. Six (6) of Retirement Service's classifications were selected as "benchmarks" for the purpose of collecting salary and benefits data within the labor market. Benchmark classifications are those jobs that are expected to be common in the labor market such that adequate samples of data can be collected.

As part of the study, Gallagher was asked to review and provide feedback on similarities and differences between the City of San Jose's (City) classifications of Investment Officer and Retirement Investment Officer. This review is presented in the final section of this report titled "Classification Review – Investment Officer and Retirement Investment Officer."

Findings: Market Results

Market data was collected during the months October through December 2025. During the data collection process, a standardized method of data collection was applied to ensure comparability in the data reporting. The complete list of market findings is provided in Table 1 of this Executive Summary.

The survey results indicate that Retirement Services' benchmark salaries are, on average, **7.86% below market median** for base salary. In examining total compensation, which represents base salary plus the value of the agency's benefits (cash supplements such as deferred compensation, OASDI [6.25%] and medical, dental and vision program costs) the survey results indicate that Retirement Services is, on average, **7.95% below market median**. When comparing base salary and total compensation, there is no impact on market position when considering Retirement Services' benefits offerings.

The following chart represents the percent above or below market in both base salary and total compensation for each surveyed classification. When analyzing survey data, Gallagher deems a classification to be competitive with the market if it falls within 5% (above or below) the median. Based on this criterion, Gallagher has identified that three (3) of the benchmark classifications fall below this threshold for base salary and are therefore not considered competitive with the market.

The market data is designed to be a tool to help Retirement Services develop a competitive compensation plan to attract and retain talent and is used to anchor all of the agency's classifications to the market.

Table 1. Base Salary and Total Compensation Market Results

Classification Title	# of Matches	Base Salary % Above or Below Median	Total Comp % Above or Below Median
Retirement Deputy Chief Investment Officer (Proposed)	3	Insuff. Data	Insuff.Data
Retirement Investment Analyst I (Unclassified)	5	-7.54%	-4.38%
Retirement Investment Analyst II (Unclassified)	8	-13.81%	-16.64%
Retirement Investment Officer	7	1.50%	2.47%
Retirement Investment Officer, Senior (Unclassified)	7	-15.84%	-14.95%
Retirement Investment Operations Supervisor (Unclassified)	6	-3.61%	-6.26%

Following the analysis of market findings and in designing the compensation plan, Gallagher recommends the following salary adjustments:

	<u>No Change</u>	<u>1-5% Incr.</u>	<u>>5% Inc</u>	<u>Range Decrease</u>
Number of Classifications	1	1	3	0

One classification has insufficient market data with which to make a recommendation, and we will utilize internal relationship principles to place this classification into the agency's salary schedule.

Implementing the survey involves various considerations, including Retirement Services' history with similar actions, available resources, and ability to make adjustments. Gallagher appreciates the opportunity to conduct this study for Retirement Services and is available to provide further guidance as Retirement Services proceeds with implementation.

Retirement Services Total Compensation Full Report

Background

In October 2025, Retirement Services contracted with Gallagher to conduct comprehensive Total Compensation Study. This compensation review process was precipitated by:

- The concern of Retirement Services' two Boards of Administration (Police and Fire Employees and Federated Employees) ,and management that employees should be recognized for the level and scope of work performed, and that they are paid on a fair and competitive basis that allows Retirement Services to recruit and retain a high-quality staff;
- The desire to have a compensation plan that meets the needs of Retirement Services; and
- The desire to ensure that internal salary relationships are based upon objective, non-quantitative evaluation factors, resulting in equity across Retirement Services.

The goals of the compensation study are to assist Retirement Services in developing a competitive pay and benefit plan, which is based upon market data, and to ensure that the plan is fiscally responsible and meets the needs of Retirement Services with regard to the recruitment and retention of qualified staff.

All compensation findings and recommendations presented in this report were effective pre-January 1, 2026.

Study Methodology

Before commencing the total compensation study, three key survey elements needed to be established prior to the data gathering process. These elements include 1) defining the labor market to be surveyed, 2) selecting the agency's benchmark job classifications for market comparison, and 3) defining the benefits to be collected.

Labor Market

Recognizing that defining the labor market can often be subjective, Gallagher utilizes an objective methodology to evaluate and identify agencies that closely resemble Retirement Services, thereby increasing the likelihood of obtaining comparable job data. For this study, the comparator agencies were those which have been used historically for Retirement Services' studies. In general, the criteria used to compare agencies included the following:

- 1. Organizational type and structure.** Agencies of a similar size and providing comparable services to that of Retirement Services are generally recommended to be used as market comparators.
- 2. Population served, staff size, and operational budgets.** These elements help contextualize the scale of operations and agency capacity, including the resources (such as staff and funding) available to deliver services, which can impact compensation levels.
- 3. Services provided.** Agencies providing the same type of programs, services, and/or employing staff in comparable roles, are ideal for surveying, as this increases the likelihood of relevant job classification matches.
- 4. Localized labor market and geographic location.** Surveying agencies within the same or neighboring localized labor markets ensures that compensation data accurately reflects local economic conditions. These conditions include factors such as cost of living, housing affordability, regional wage trends, and workforce availability. Geographic proximity also increases the likelihood that agencies are competing for the same talent pool, making the data more relevant for recruitment and retention planning.

Given their specialized services, Retirement Service currently has an established labor market of eight (8) comparator retirement system agencies within the State of California.

- Alameda County Employees' Retirement Association
- Contra Costa County Employees' Retirement Association
- Los Angeles City Employees' Retirement System
- Orange County Employees' Retirement System
- San Bernardino County Employees' Retirement Association
- San Francisco Employees' Retirement System
- San Mateo County Employees' Retirement Association
- State of California Public Employees' Retirement System*

*While the State of California's Public Employees' Retirement System (CalPERS) is significantly larger than Retirement Services, as are some of the other comparator agencies, because technical job classifications involve similar work across agencies, organizational size is less critical for these roles. However, size becomes more significant when comparing management positions. Factors such as managing a large staff, consequences of error, political sensitivity, and job visibility all increase with organizational size. For that reason, care was taken to calibrate the management level job matches to ensure data was not skewed by size. Overall results for data sets which include and exclude CalPERS as a comparator agency are provided below.

Data Set Including CalPERS

- Base Salary – on average for all classifications, Retirement Services' salaries are 7.86% below the market median
- Total Compensation - on average for all classifications, Retirement Services' salaries plus the costs of benefit programs are 7.95% below the market median

Data Set Excluding CalPERS

- Base Salary – on average for all classifications, Retirement Services' salaries are 7.52% below the market median
- Total Compensation - on average for all classifications, Retirement Services' salaries plus the costs of benefit programs are 11.37% below the market median

While there are differences between the two data sets with respect to the percentages below the market median for total compensation, Gallagher recommends that salary levels should be set on base salary differences, which are not significant. For those reasons, Gallagher recommends that CalPERS be retained on the list of comparator agencies.

Benchmark Classifications

The Total Compensation Study conducted by Gallagher encompasses six (6) Retirement Services' job classifications. Following are the selected benchmark classifications for the survey:

Table 2. Benchmark Classifications

Retirement Services Classification Title	
1.	Retirement Deputy Chief Investment Officer (New classification)
2.	Retirement Investment Analyst I
3.	Retirement Investment Analyst II
4.	Retirement Investment Officer
5.	Retirement Investment Officer, Senior
6.	Retirement Investment Operations Supervisor

Salary and Benefits Data

The last element to consider before initiating a total compensation study is the specific salary and benefit data that will be collected and analyzed. Following discussions with Retirement Services, the following data was collected for each benchmark classification. The cost of these benefits to each agency was then converted into values and reported as part of total compensation.

- **Monthly Base Salary.** The top of the salary range and/or control point was reported. All figures are presented in monthly values.
- **Retirement.** Given the predominant practice of new employees eligibility for PEPRA retirement only benefits, Gallagher no longer calculates any benefits enhancements as part of our analysis. If an employer participates in Social Security, the employer contribution of 6.2% of the base salary (up to the federally-determined maximum contribution) was reported.
- **Deferred Compensation.** Deferred compensation contributions provided to all employees of a classification, with or without requiring the employee to make a contribution, was reported.
- **Health Insurances.** The employer paid premiums for an employee with family coverage was reported and includes medical/cafeteria, dental, vision, and other comparable health insurance offerings.
- **Leaves.** Gallagher does not include paid time off as a compensable factor in our total compensation model because the base salary reported already has the paid time off value in it; i.e. employee's salaries are based on a 2,080 hour work year (52 weeks x 40 hours per week) - vacation/holiday hours are included in that work year and no additional pay is provided to the employee. All information on paid time off is presented in Appendix III, Additional Benefits.
- **Auto Allowance.** Allowance paid to the employee, or the provision of an auto for personal use only, was reported. When a vehicle is provided for commuting and other personal use, \$450 is reported. Mileage reimbursement is excluded. Because none of the comparator agencies provides car allowances, or provides vehicles, we have not included that category in the total compensation data sheets.

All the benefit elements above represent an ongoing cost for which an agency must budget. Other benefit costs, such as sick leave, tuition reimbursement, and reimbursable mileage are usage-based and cannot be quantified on an individual employee basis.

Data Collection and Matching Methodology

Data was collected during the months of October through December, through comparator agency websites, conversations with human resources, accounting, and/or finance personnel, and careful review of agency documentation such as classification descriptions, memoranda of understanding, organization charts, and other documents.

The data collection and review process is a critical step in ensuring the validity of the data and the overall credibility of the results. Gallagher relied on Retirement Services' classification descriptions as the foundation for making the job matching comparison. When examining possible matches, Gallagher does not match based upon job titles, which can often be misleading, but rather analyzes class descriptions before a comparable match is determined. The matching methodology includes an analysis of each class description and the whole position by evaluating a number of factors, including job duties and functions, levels within a class series, reporting structure and organizational relationships, minimum qualification standards, the scope and complexity of the work, decision making authority, budget and administrative responsibilities, consequences of actions, contact with others, and working conditions. For a match to be deemed valid, Gallagher requires that a classification's "likeness" be at approximately 70% of Retirement Services' benchmark classification.

When an appropriate match is not identified, Gallagher often uses a "hybrid" approach and may include a *functional hybrid* or a *span of responsibility hybrid*. A *functional hybrid* means that the job of one classification at Retirement

Services is performed by two or more classifications at a comparator agency. A *span of responsibility hybrid* is used when the comparator agency has one class that is “bigger” in scope and responsibility and one class that is “smaller,” and where Retirement Services’ job class falls in the middle.

If an appropriate match could not be found, then no match was reported as a non-comparable (N/C).

The effective date of the salary data for comparators is presented in each data sheet in Appendix II Market Comparison Findings - Detail; all data is pre-January 1, 2026.

Market Findings

Total Compensation Results

The results from the market survey are reported and both base salary and total compensation. The *mean* (average) and *median* (midpoint) of the comparator agencies are reported. The *mean* is the sum of the comparator agencies’ salaries/total compensation divided by the number of matches, whereas the *median* is the midpoint of all data, with 50% of data points below and 50% of data points above. Retirement Services’ data is represented as a percent above or below the market mean and median. When analyzing the market results, Gallagher recommends the median over the mean, as the mean can be skewed by extremely high or low salary values.

Gallagher requires a minimum of four (4) comparator agencies with matching job classifications to Retirement Services’ benchmark classification for the data to be reported. The reason for requiring a minimum of four (4) matches is so that no one comparator classification match has undue influence on the calculations. Sufficient data was collected from the comparator agencies for five (5) of the six (6) benchmark classifications. The detailed market data for each benchmark classification is provided in Appendix II – Market Compensation Findings – Detail.

The following table represents a summary of the market base salary and total compensation (base salary plus benefits) findings. For each benchmark classification, the number of matches (agencies with a comparable position) and percent Retirement Services is above or below the market is represented. The table is sorted in alphabetical order, consistent with the data sheets in Appendix II. A classification falling within 5% of the median is considered to be competitive in the labor market for survey purposes due to the differences in compensation policy, actual scope of work, and position requirements.

Table 3. Base Salary and Total Compensation Market Results

Classification Title	# of Matches	Base Salary % Above or Below Median	Total Comp % Above or Below Median
Retirement Deputy Chief Investment Officer (Proposed)	3	Insuff Data	Insuff.Data
Retirement Investment Analyst I (Unclassified)	5	-7.54%	-4.38%
Retirement Investment Analyst II (Unclassified)	8	-13.81%	-16.64%
Retirement Investment Officer	7	1.50%	2.47%
Retirement Investment Officer, Senior (Unclassified)	7	-15.84%	-14.95%
Retirement Investment Operations Supervisor (Unclassified)	6	-3.61%	-6.26%

Base Salary Versus Total Compensation

The benefits analysis indicates that Retirement Services' total compensation package is, on the whole, competitive within the labor market. Retirement Services is a department within the City of San Jose who have overall management responsibility for benefits program offerings.

Supplemental Data Collection

Gallagher was asked to collect supplemental data on the following topics/practices within the comparator agencies; general trends are summarized below, and more detailed information is presented in Appendix IV – Supplemental Information.

- Eligibility Step and Merit Increases; Range Progression
 - All agencies have provisions within agreements or resolutions on progression through ranges subject to performance; while they differ in time frames within which progression occurs, they provide clarity on merit/special awards within their respective organization.
- Performance Based Bonuses and Basis (Individual or Fund) – Of the eight (8) agencies, only two (2) reported any type of bonus/incentive award programs; CalPERS has a certification award system for its Investment Officer series, and San Francisco has a signing bonus for its Chief Executive Officer/Chief Investment Officer.
- Recruitment and Retention Statistics: Measures Taken to Address Challenges – Of the eight (8) agencies, four (4) reported they did not have staffing or recruiting issues; data was not available from two (2) agencies, and two (2) reported recruitment/retention bonus payments. No agencies provided statistics on this topic.

Recommendations

As a department within the City of San Jose, Retirement Services utilizes the City's classification, compensation and benefits program systems, and any changes to the compensation ultimately will be reflected in the City's overall pay structure. As a unique entity within the City, Retirement Services does have separate and independent Boards, the Police and Fire Employees' Retirement Plan Board of Administration, and the Federated Employees' Retirement Plan Board of Administration to whom it is accountable for overall operational policies and procedures within the respective retirement systems. These two Boards are authorized to establish compensation levels for Retirement Services' classifications and employees, and formal ranges are established by the City. Once those ranges are established, and as part of the City's budget process, City Council approves Retirement Services' salary ranges.

Any compensation decisions by these governing boards may take into consideration City's pay philosophy, the desired pay level relative to the market, the consideration of additional or alternative compensation programs, and the competitive landscape for recruiting talent. Additional obligations related to negotiations with represented units also influence the strategy for implementing changes in compensation.

Establishing Salary Recommendations

As a starting point, Gallagher would utilize market data to develop the salary recommendations for benchmarked classifications if there is sufficient data; when that is not the case, internal equity principles are used to establish salary recommendations for any classifications that were either not benchmarked or yielded insufficient market data for placement. Where it was difficult to determine internal relationships due to unique qualifications or characteristics of a particular classification, Gallagher may rely on past internal salary relationships to inform the recommendation.

Internal pay equity is a key principle in pay administration. While survey data provides guidance on the value of work externally, how jobs are valued internally is key to ensuring fair and consistent compensation within an organization. The process involves assessing the relative worth of different jobs within the organization and the same whole job

factors used to compare positions to the market are used to determine internal values. This ensures classifications in similar roles or with similar responsibilities are compensated similarly.

Building from the salaries recommended for the benchmark classifications, internal salary relationships can be established to determine recommendations for all non-benchmarked classifications. There are some standard internal differentials used in compensation systems; however, for this limited study, given that five (5) benchmarks had sufficient data, Gallagher is recommending market placement for them; specifically,

- **Retirement Investment Analyst I**
 - Current salary - \$10,252/month
 - Recommended salary – City pay range closest to the market median of \$11,026/month (an increase of approximately 7.54%)
- **Retirement Investment Analyst II**
 - Current salary - \$11,998/month
 - Recommended salary – City pay range closest to the market median of \$13,655/month (an increase of approximately 13.81%)
- **Retirement Investment Officer**
 - Current salary - \$18,506/month
 - Recommended salary – Given the marginal percentage over market (1.5%), recommend maintain current range
- **Retirement Investment Officer, Senior**
 - Current salary - \$21,555/month
 - Recommended salary – City pay range closest to the market median of \$24,969/month (an increase of approximately 15.84%)
- **Retirement Investment Operations Supervisor**
 - Current salary - \$15,998/month
 - Recommended salary – City pay range closest to the market median of \$16,576/month (an increase of approximately 3.61%)
- **Retirement Deputy Chief Investment Officer**
 - Current salary - \$26,250/month
 - Recommended salary – as there is insufficient data for this new classification, Gallagher recommends the salary be set 15% above the highest-level classification managed, specifically the Senior Retirement Investment Officer; that would result in a monthly salary of \$28,715/month - an increase of approximately 9%. This salary would not cause compaction with the Chief Investment Officer, whose salary is \$34,000/month, 18% higher than the recommended salary for the Retirement Deputy Chief Investment Officer.

Classification Review – Investment Office and Retirement Investment Officer

Gallagher was asked to review these two classifications since the classification specifications are very similar in content; findings from our review are outlined below:

- Establishment Date/**Distinguishing** Characteristics:
 - The Investment Officer classification was established on August 1, 2009 and revised on March 1, 2011; positions were allocated to both the Finance and Retirement Services Departments.
 - The Retirement Investment Officer was established on February 1, 2012; positions were allocated only to the Retirement Services Department.
 - Gallagher has presumed that the Retirement Investment Officer was carved out from the Investment Officer classification as a specialized focus area of investments rather than a dual focus on both finance and investments.

- Minimum Qualifications:
 - The minimum qualifications for both classifications is the same in terms of education, but the following differences exist for experience and licensing:
 - Experience – while both classifications require five years of work-related experience in a defined benefit retirement fund, investment consulting, investment management or pension consulting, the Investment Officer has an alternative experience option of “experience with investing funds for a municipality or working for a financial firm handling municipal investment accounts” - that option is not provided for the Retirement Investment Officer.
 - Licensure – possession of at least one of the listed licenses in both classification specifications is required for the Investment Officer, but is only listed as “highly desirable” for the Retirement Investment Officer.
- Basic Knowledge, Skills, and Abilities (KSA's):
 - Both classifications share most of the KSA's in the multiple assignment areas; some KSA's with respect to fiscal administration, cash flows, Fixed Income portfolio management, banking and broker/dealers have been removed from the Retirement Investment Officer's classification specification.
- Typical Essential Functions:
 - When reviewing essential functions, specific attention is paid to the frequency, percentage of time spent on tasks, and the impact of the task itself on the overall body of work. The City utilizes the following metrics when evaluating these factors:
 - Frequency is defined as a percentage of time, which should total 100%.
 - “Continuous” is daily and comprises approximately 20%+ of time
 - “Frequent” is weekly and comprises approximately 15%+ of time
 - “Occasional” is monthly and comprises approximately 10%+ of time
 - “As required” is intermittent and comprises approximately 5%+ of time

Of note is that the City does not evaluate the impact of a task on the overall body of work.

- The Retirement Investment Officer's classification specification lists seven (7) essential duties; four (4) are performed on a continuous basis (comprising 80% of the time spent on tasks); two (2) are performed occasionally (comprising 20% of time) and one (1) is performed as required (comprising 5% of time).
 - The total for all tasks is 105%, which is 5% more than the City's standard of 100% for all tasks. The additional 5% is the standard statement about the performance of other similar duties.
- The Investment Officer's classification specification lists thirteen (13) essential duties; seven (7) are performed on a continuous basis (comprising 140% of the time spent on tasks); two (2) are frequent (comprising 30% of time) three (3) are performed occasionally (comprising 30% of time) and one (1) is performed as required (comprising 5% of time – the standard statement of the performance of other similar duties.)
 - The total for the Investment Officer's tasks is 205%, twice the City's standard of 100%. The additional 5% is the standard statement of the performance of other similar duties.
 - Six (6) of the Retirement Investment Officer's key tasks are also performed by the Investment Officer as continuous or occasional tasks totaling 100%.
 - The remaining Investment Officer's tasks, which are not performed by the Retirement Investment Officer, are a combination of financial and cash management, reporting, and other investment responsibilities.
- Additional Information:
 - These are similar in both class specs, with the exception that the section on “Fixed Income Portfolio Manager – City Operating Funds Specialty” is not in the Retirement Investment Officer classification specification.

Findings

Based on this review and comparison, while the Investment Officer does have common investment tasks with the Retirement Investment Officer, given the fact that the Investment Officer's total percentages are 200%, and the Retirement Investment Officer's total percentages are 100%, the distinction appears to be primary focus of each classification; from this review, it appears that the Retirement Investment Officer's primary focus is investment, whereas the Investment Officer's focus is a combination of finance and investment. Given the City's broad metrics for percentages of time, it is not possible to make a more measured assessment. That would require an in-depth classification review wherein both classifications document their tasks in a way which ensures all tasks must add up to 100%, with a metric of the impact of that task; additional questions on spans of control, decision making authority, would also provide more clarity on those similarities and differences.

Conclusion

Gallagher would like to reiterate that this report and the findings are meant to be a tool for Retirement Services to create and implement an equitable compensation plan for the studied classifications. Compensation strategies are designed to attract and retain excellent staff; however, financial realities and Retirement Services' expectations may also come into play when determining appropriate compensation philosophies and strategies for those classifications within this study.

It has been a pleasure working with Retirement Services on this critical project. Please do not hesitate to contact us if we can provide any additional information or clarification regarding this report.

Respectfully submitted by,

Gallagher, Formerly Koff & Associates

OCERS Administrative Management	MOU, Section 4. Merit Increases Within Range
	<p>B. Salary increases within a range shall not be automatic. They shall be based upon merit and granted only upon the affirmative recommendation of the Department Head.</p> <p>F. Effective June 28, 2024, employees shall be eligible for merit increases at the time of their evaluation. Merit increases of up to 9% within the salary range may be granted based upon the employee's performance and in accordance with the following rating criteria:</p> <ol style="list-style-type: none"> 1. A performance rating of "Meets Performance Objectives" may earn a 3% increase not to exceed the advertised maximum. Reviewer approval required. 2. A performance rating of "Exceeds Performance Objectives" may earn a 6% increase not to exceed the advertised maximum. Department Head approval required. 3. A performance rating of "Exceptional Performance" may earn a 9% increase not to exceed the maximum of the range. Department Head approval required. <p>G. Advancement and movement within the "Exceptional Performance" component of the Administrative Management salary ranges may only be achieved by a merit rating of "Exceptional."</p> <p>H. If, in the Department's judgment, the employee's performance does not merit a salary increase on the merit increase eligibility date and a deferral of decision accompanied by an intensive effort at improved performance might be productive, the Department shall complete the structured merit rating and defer a decision regarding the merit increase any number of pay periods, but not to exceed thirteen (13) pay periods. A deferral of less than thirteen (13) pay periods may be further extended not to exceed thirteen (13) pay periods from the original merit eligibility date. The employee may be reevaluated at any time, but in any event shall be reevaluated on the structured merit rating prior to the end of the thirteenth pay period. The employee's merit increase eligibility date shall not be changed by such deferral.</p>

Supplemental Information
December 2025**

	<p>Employees shall be hired at Step 1 of the established base salary range, except as otherwise provided in this subdivision. Variable entrance steps may be established if justified by recruitment needs through Step 8 with the approval of the appointing authority and through the top step with the approval of the Director of Human Resources or designee.</p> <p>Within the base salary range, all step advancements will be made at the beginning of the pay period in which the employee completes the required number of service hours. When an employee reaches the required number of service hours with 80 hours in each pay period, the step advancement will be made at the beginning of the next pay period. Approval for advancement shall be based upon completion of the required length of service hours in the classification, satisfactory work performance, and appointing authority recommendation.</p> <p>Completed service hours shall be defined as regularly scheduled hours in a paid status, up to 80 hours per pay period. Unless otherwise approved by the Board of Supervisors, step advancements within a base salary range shall be based upon a one-step increment, approximately two and one-half percent. The employee shall be eligible for step advancements after completion of increments of 1,040 hours until the top step of the range is reached.</p>

MEA Misc	MOU, Article III - Pay, Hours and Benefits, H. Salary Plan and Salary Adjustments
	<p>The plan consists of three pay ranges, A, B, and C. Range A was established as a 25% open range. Range B was established as a 15% open range. Range C was established as a 5% open range. Adjustment of compensation for individual employees is addressed below.</p> <p>Subject to the other provisions of this section B, employees placed in MCCP in Range A will receive a 5% increase in pay on their anniversary date (anniversary date for their pre-MCCP class, if applicable, or else their employment anniversary date). Salary progression under this paragraph is not available for employees placed in Ranges B or C.</p> <p>Range A, B, and C Placement. Subject to the approval from the appointing officer, new or incumbent employees may be placed at a rate of pay in range A or B. Subject to the approval from the Human Resources Director, Controller, and Mayor’s Budget Director, appointing officers may request that new or incumbent employees be placed at a rate of pay in range C.</p> <p>Appointments into ranges A, B, and C shall be consistent with the Fair Pay Act, which includes performance and merit, education and training, experience, and seniority. Where appropriate, approval into ranges B and C shall be time-limited.</p>

City of San Jose Office of Retirement Services
Supplemental Information
December 2025

	<p>Permanent and probationary employees serving in regular established positions shall be considered by the appointing authority on their salary anniversary dates for advancement to the next higher step in the salary schedule for their respective classes based on hours served in that classification as defined below. A step shall be defined as 5.74%, and all references to a "step" in this agreement are understood to equate to 5.74%. All increases shall be effective at the beginning of the next full pay period. Salary range adjustments for a classification will not set a new salary anniversary date for employees serving in that classification.</p> <p>After completion of 1040 regular hours of satisfactory service in Step A of the salary schedule, and upon recommendation of the appointing authority, the employee shall be advanced to the next higher step in the salary schedule for the classification. If an employee is appointed at a step higher than the first step of the salary range for that class, the first merit increase shall be after completion of 2080 regular hours of satisfactory service.</p> <p>After the completion of 2080 regular hours of satisfactory service in each of the salary steps above A, and upon recommendation of the appointing authority, the employee shall be advanced to the next higher step in the salary schedule for the classification until the top of the range is reached.</p> <p>When recommended by the appointing authority and approved by Human Resources Director, employees may receive special merit increases at intervals other than those specified in this Section. The Director's decision shall be final. Changes in an employee's salary due to promotion, upward reclassification, postponement of salary step increase, or special merit increase will set a new salary anniversary date for that employee.</p>
